

NEW YORK STATE ENERGY CODE COURSE

The 2010 Energy Conservation Construction Code of New York State (ECCCNYS-2010) became effective as New York State's Energy Code on December 28, 2010, and is now applicable throughout New York State.

The 2010 Energy Code adds more mandatory requirements and is more stringent in meeting energy efficiency than the 2007 version. Its intent is to regulate the design and construction of buildings for the effective use of energy and to provide flexibility to allow the use of innovative approaches and techniques to achieve the effective use of energy.

The New York State Energy Research and Development Authority (NYSERDA), with funding from the American Recovery and Reinvestment Act of 2009 (ARRA), and working with Urban Green Council and the New York Chapter of the American Institute of Architects, has developed a 4-hour course to familiarize **architects and engineers** with the code, orient them to the fundamentals of low energy design, and review the necessary process to demonstrate compliance.

The course will consider commercial buildings, which includes residential buildings over three stories, but will not cover low-rise residential in detail. It will also address the Energy Conservation Code of New York City (Local Law 1 - 2011), which is more stringent than the State code. ANSI/ASHRAE/IESNA Standard 90.1 - 2007, which can be used as an alternative compliance pathway to meet the requirements of ECCCNYS - 2010, will be referenced, but not covered in detail.

The four-hour training sessions will be presented at various venues throughout New York State. The first will be on June 23, 2011 in New York City. A total of 80 will be offered, continuing until June 2012. An \$85 course fee includes a course manual. Copies of the ECCCNYS-2010 code book will be available to attendees at a discount.

Continuing Education Credits

- *AIA HSW/SD: 4.0 (AIA credits may also be used by NY State Professional Engineers and Land Surveyors)*
- *GBCI: 4.0 (GBCI credits are for LEED Accredited Professionals)*
